

PRESENTING AUCTIONACCESS® VERSION 3.0:

AUCTION TECHNOLOGY THAT SETS THE WORLDWIDE STANDARD

***New Platform Technology from AutoTec® Will Improve Security
And Allow Wholesale Vehicle Professionals to Manage Their Auction Accounts***

BIRMINGHAM, AL.– February 7, 2008 – With the release of AuctionACCESS Version 3.0, the software platform used by thousands of professionals in the wholesale vehicle auction industry, users will benefit from three new breakthrough features — a single AuctionACCESS card needed for entry at all participating auction locations, myACCESS, the customizable Web site that allows users to manage their auction accounts, and the future release of online registration with faster access to auction locations.

Auction companies Manheim, ADESA, Auction Broadcasting Company, BSC America, ServNet Auctions and several major independent auto auctions are supporting the latest AuctionACCESS technology. “They’re on the front line helping the vehicle remarketing industry grow securely,” says ADESA’s EVP of Operations and Finance, Paul Lips.

AutoTec President, Chuck Redden says, AuctionACCESS Version 3.0, which will include a new annual membership program for all users, is designed to improve the way the auction industry operates. “The high level of turnover in the industry is making it increasingly difficult to identify who is authorized to do what for whom. AuctionACCESS technology will allow us to safeguard against unauthorized retail buyers and help our auction customers monitor who should really be entering the wholesale auctions.”

ABOUT THE AUCTIONACCESS CARD

- **Increased security at auction locations**
- **Streamlines dealership representative access with a single photo id card**
- **Simplified buying and selling privileges at over 180 locations nationwide**

ABOUT myACCESS

- **Personalized 24/7 account management**
- **Pre-register for new auctions**
- **Update personalized membership information in real time**

ABOUT AUCTIONACCESS ONLINE REGISTRATION

- **Reduced wait times at dealer registration**
- **Faster access to auction locations**

ABOUT AUTOTEC, THE FOUNDERS OF AUCTIONACCESS

AuctionACCESS was developed by AutoTec, LLC, the premier provider of e-business solutions to the auction remarketing industry. AutoTec is based in Birmingham, Alabama with business interests across North America and abroad. More than 180 auto auctions across North America use AuctionACCESS, and the platform is expanding rapidly around the world, and now is used by dealerships and reps in more than 70 countries. AuctionACCESS is the worldwide industry standard for managing access to wholesale vehicle auctions, accounting for more than 90% of cars sold through NAAA member auctions.
